

EAD BLASTER 24

24 Tube

Capacity

The BeadBlaster™ 24 completely lyses, grinds and homogenizes a broad variety of biological samples. Even the most difficult and resistant samples are fully homogenized, often in 35 seconds or

The stainless steel tube carrier subjects up to 24 samples to an optimized, high speed, 3D motion, producing high energy impacts between the samples and micro-beads to release cellular contents. After homogenization, samples can be centrifuged and the supernatant collected for further processing.

Operating parameters for the BeadBlaster 24 are set and displayed digitally. To protect fragile, heat sensitive samples, the unit can be programmed to operate in shortened consecutive cycles with a rest period in between. Up to 50 such programs can be stored in memory and recalled for future use. A transparent lid allows for visualization of samples, and features a mechanical lid lock that prevents opening of the lid when the BeadBlaster is in operation. A brushless motor reduces motor noise and provides maintenance free operation.

Benchmark offers an assortment of prefilled tube kits for a variety of sample types. The popular Triple-Pure™ kits include acid washed, heat treated, zirconium beads. The beads are tested to be free of nucleases, making them ideal for molecular biology applications. A convenient starter kit (D1032-SK) is available to accommodate a broad range of sample types and optimize applications.

Technical Data:

Capacity: 24 x 2.0ml tubes

Speed: 4.00 to 7.00 m/s, 0.05 increments Cvcle time: 1 - 90 sec. 1 sec increments Pause between cycles: 0-2 min, 1 sec increments

Max. cycles per program: 10 Program memory: up to 50 Accel. / Decel. time: <2 sec / <2 sec <68db Noise level:

Dimensions (WxDxH): 11 x 14.2 x 15.2 in / 28 x 36 x 38.5 cm

55 lb / 25kg Weight:

100V to 240V, 50-60Hz, 600W Electrical:

Warranty: 2 years

Standard Glass beads (Acid Washed)

Triple-Pure™ (Molecular Biology Grade)
