STAT CART

This procedure cart was specifically designed for patients and caregivers in mind. Defining features promote infection control, adaptability and durability. **STATCART** standard sizes and options in drawers and trays were made to be compatible with existing procedure carts on the market today. This compatibility creates uniconformity and allows hospitals to easily upgrade their cart without the need to update protocols. **STATCART** is quickly adaptable to meet the demands of different departments with its efficient equipment management Rail System. Due to the adaptability of its components, this system allows customers to find the optimal solution to answer specific clinical needs. Available with multiple lock options including a key lock, electronic keypad and electronic keypad with proximity card reader. The locking system can also be set up to offer dual credential unlocking. The cart is easily maneuvered around on plate-mounted swivel and locking casters.

This high quality storage system is manufactured and sourced in the USA and can withstand any demanding healthcare environment.

UV-CLEAN

KILL MICROOGANISMS WITH UV-CLEAN

UV-CLEAN by Proximity is the award-winning, automated device that provides no-touch ultraviolet disinfection with UV-C light, the most germicidal ultraviolet light. This strong and safe device **efficiently inactivates 99.9% of bacteria and viruses** on high touch surfaces. With this small, yet powerful device, you can say goodbye to microorganisms and remove concerns with an enhanced cleaning protocol to improve current infection control practices.

APPROXIMATE 99% REDUCTION @ 2MINUTES

For the follwing organisms requires:

Salmonella Species	53 uW/cm2
E. Coli	50 uW/cm2
Influenza	50 uW/cm2
Staphylococcus Species	42 uW/cm2
Coronavirus (SARS 1)	35 uW/cm2
Streptococcus Species	33 uW/cm2

POINT OF CARE: HEALTHCARE FACILITIES

Hospital acquired infections affect millions of people and add billions of dollars to healthcare costs in the U.S. annually. Although hospitals and healthcare facilities implement rigorous cleaning and disinfection practices to prevent Healthcare Associated Infections (HAIs), harmful pathogens still spread throughout susceptible environments. In fact, HAIs, including C. diff, MRSA and Norovirus, can affect millions of people and add billions of dollars to healthcare costs in the U.S. annually.

80%
of pathogens are transferred by touch

1 out of 31
patients develop a HAI

1.7 million
HAIs occur in U.S. hospitals each year

22
5
Your length of stay in the hospital increases by 17.6 days if you get an HAI

STAT CART | EQUIPMENT MANAGEMENT

The EVERHUTCH equipment management system provides flexibility and the opportunity to configure any cart to work in any department. Accessories can be easily removed, added or relocated to another position on the cart to increase efficiency and ergonomics. These accessories can also be moved easily from existing wall equipment rail systems to the cart and back again. This system gives healthcare workers the flexibility needed for optimum patient care.
