CryoBeacon

Temperature

Humidity

Scan the “Register Me” QR code located on the logger. If you are unable to scan the code, you may register your logger by visiting www.register.mvebio.com and entering the serial number found on the top of the logger under the “Register Me” label.

Download the ‘Tec4App’ available on both the App Store and Google Play Store.

Scan the QR code on the CryoBeacon with Tec4App and read the data immediately.

MVE Condition Monitoring

SmartTag continued

To start the SmartTag, press the START button and the temperature will show on the LCD. If no probe is attached, the logger will read ambient temperature.

To start recording data, press and hold the START button until the record icon  is displayed on the left side of the LCD. The SmartTag is now recording data. Log into the app or cloud to verify after registration is completed.

Stop data recording in the MVECloud or Tec4App. The STOP button is deactivated to prevent accidental stoppage during shipment.

Verify the temperature via the LCD on the SmartTag. Data is not uploaded to the MVECloud until after registration is complete.

Note: If the battery is not fully charged prior to the first shipment, please see instructions in the Operation Manual for charging the battery.

Operation Manual and additional tutorials for navigating the MVECloud and Tec4App are available at www.mvebio.com.
