

MPR-1412-PA  
MPR-1412R-PA

# Pharmaceutical Refrigerator

Accurate Temperature Control  
with Fast Recovery to Setpoint

48.2 cu.ft. | 1364 L  
48.0 cu.ft. | 1359 L

MPR-1412-PA

The MPR-1412-PA (shelves) and MPR-1412R-PA (drawers) large capacity pharmaceutical refrigerators deliver a stable, reliable temperature control for clinical, pharmaceutical, biomedical storage and processing. Fast recovery following door openings assures safe storage during frequent access and high ambient conditions.

## Positive Airflow Assures Interior Uniformity, Quick Recovery

Forced air circulation with multiple blowers assures temperature uniformity at all shelf or drawer levels. Internal shelf or drawer clearances permit the positive airflow to restore temperature to setpoint following door openings. This cooling power and airflow management compensates for heat generated by instrumentation if used inside the cabinet.

## Integrated Circulation Avoids Temperature Stratification

The top-mounted air circulation blower directs air down the back, side and front of the load in drawers or shelves. Regardless of location, all products are subjected to the same safe temperature to assure reproducibility and repeatability of stored product viability.

## Precision Temperature Control Protects Inventory

Many pharmaceuticals are degraded or destroyed if accidentally frozen. It is important that temperature be fixed at the desired setpoint in accordance with drug manufacturers' insert specifications. MPR Series pharmaceutical refrigerators operate over a temperature range of 2°C to 23°C, adjustable in 0.1°C increments. Actual interior air temperature is displayed to 0.1°C.

## Microprocessor Controls Simplify Operation

A microprocessor controller monitors all functions. Setpoint is factory set at 5°C. A soft key interface allows setpoint adjustment throughout the operating range. Audible and visual warnings indicate door ajar or temperature deviation from setpoint. The large easy-to-read LED display confirms actual temperature to 0.1°C resolution.

## Choose Your Inventory Management Preference

The MPR Series offers two choices in inventory control. The MPR-1412-PA includes 8 open-wire shelves strong enough to hold bulk loads. The MPR-1412R-PA is equipped with 8 heavy-duty, fully-extendable painted steel pull-out drawers for more convenient access to stored product such as large bottles or reagent kits.

## Choose Your Inventory Management Preference

Open wire shelves (shown) are adjustable to allow for loads of varying heights such as bulk storage, or process equipment such as fraction collectors. The Model MPR-1412R-PA with pull-out drawers (not shown) offers a practical solution with additional ergonomic advantages for handling bulk items.

Model MPR-1412R-PA

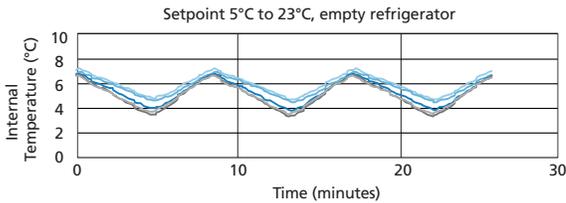

## Ideal for Storage or Process Instrumentation

The MPR-1412R-PA pharmaceutical refrigerator is configured to provide close temperature control for both storage and process applications. A powerful refrigeration system delivers fast temperature pull-down, recovery and tolerance for high ambient temperatures. SNAP compliant refrigerants and energy efficiency helps improve LEED scores.

## Cycle Defrost Function

The cycle defrost and evaporator temperature sensor system ensures that defrost occurs only when necessary and automatically, so there is no need to turn off the power for defrosting.

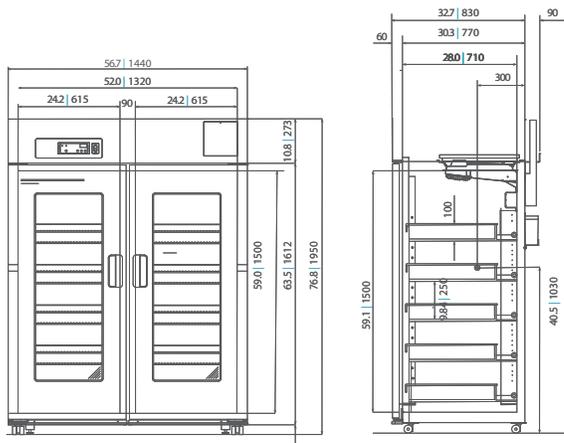

## Temperature Uniformity Data

As interior air temperature stabilizes at the desired setpoint, large mass storage volume sustains tight temperature uniformity of the load inside the insulated cabinet.

## Dimensions

Unit : inch | mm

| Model Number   |                 | MPR-1412   | MPR-1412R                              |
